SGB Series

Schmeiser Grader Blade

Specifications

Estimated weight	3,100 lbs.
Overall length (in tow mode)	44'8"
Overall transport width	8'0"
Working width	40'0"
Working length - tractor to rear of unit	27'9"
Tires/Wheels included	(8) 205-75-15
Hydraulic cylinders	4"x20"

Ideal for open field work, the Schmeiser SGB Series Grader Blade offers high-quality grading where laser and precision scrapers are not necessary. Built to maximize your daily productivity, the 40' wide working blade covers more land - with fewer passes - in less time, saving on fuel and labor. The folding tongue allows the grader to be easily transportable to multiple sites for optimum efficiency.

- 40' width: fewer passes required.
- Transport width: 8'

Schmeiser quality is built in:

- Tough, durable and reliable construction.
- Adjustable gauge wheels.
- Reversible cutting blade.
- Self-lubricating bushings on high-impact pivot points.
- 27" curved bucket height promotes optimum soil roll.
- Easy to adjust reversible gauge wheels.

Options:

- Hydraulic Depth Control
